Education

Institute of Aeronautical Engineering, Hyderabad B.Tech in Computer Science Engineering (Data Science)	<i>May 2027 (Expected)</i> GPA: 7.9
Jyothishmathi Institute of Technology and Science, Karimnagar Diploma	<i>April 2024</i> GPA: 8.69
Surya Oxford Sainik High School, Sircilla SSC	<i>May 2021</i> GPA: 10.0

Technical Skills

Languages : C, Java, Python
Frontend : HTML, CSS, JavaScript, PHP
Backend : Node.js, Express.js, RESTful APIs
Tools : MongoDB, Git, Postman, Visual Studio Code

Internship

Central Institute of Tool Design, Hyderabad	<i>May 2025</i>
• Gained hands-on experience with deep learning concepts, focusing on CNN-based image classification techniques. • Worked on image preprocessing, dataset preparation, and augmentation to improve model accuracy. • Trained and evaluated CNN models for multi-class image classification tasks using real-world datasets. • Applied performance metrics and validation techniques to analyze and improve model results.	

Projects

CNN-Based Plant Disease Detection	<i>May 2025</i>
• Developed a Convolutional Neural Network (CNN) model to automatically identify plant diseases from leaf images with high accuracy. • Preprocessed and augmented image datasets to improve model performance and reduce overfitting. • Trained and evaluated the model using deep learning frameworks, achieving reliable disease classification results. • Designed the system to support early detection, helping farmers reduce crop loss and improve yield.	
Big Data Architectures in Educational Infrastructure (Ongoing)	
• Designing a scalable big data architecture to handle large volumes of academic and administrative data efficiently. • Working with distributed storage and processing frameworks to support both real-time and batch analytics. • Building data pipelines to improve accessibility and performance for students, faculty, and administrators. • Analyzing educational data to enable insights into academic performance and institutional operations.	

Certifications on

Web Development Internship – Cognifyz Technologies	<i>Mar 2025</i>
Deep Learning – Central Institute of Tool Design (CITD)	<i>May 2025</i>
DevOps Fundamentals – Resource on IT Solutions	<i>Apr 2024</i>

Coding Profile

LeetCode: Solved 130+ Problems, Global Rank: Top 5 Lakh
HackerRank: Solved 75+ Problems, Global Rank: Top 1 Lakh
GeeksForGeeks: Solved 100+ Problems, Global Rank: Top 1 Lakh

Achievements

- Earned Silver (3*) badge in C++ on HackerRank for problem-solving proficiency.
- Earned Silver (4*) badge in Java on HackerRank demonstrating strong core language skills.
- Earned Copper (2*) badge in C on HackerRank.
